RELEVANT WORK EXPERIENCE

Developer (Remote)

Moon Funding | Aug 2017 - March 2018

Worked as a developer for this blockchain-based startup, building the technology they needed.

I worked on:

- Create our own cryptocurrency
- Blockchain based smart contracts.
- The company website.

PROJECTS

Trading Engine

Personal Project | Sep '18- July '20

Real-time matching engine that allows trading between users.
An online marketplace for users to trade.

- Matching Engine in real-time
- Interactions between client and server/database
- User account system: Register/Login/Trade/Store funds...
- Create and send buy/sell orders

Fallout Strategy

University Project | Feb '20- June '20

Real-time strategy game in which you have to survive and defeat the enemy factions to win. As the QA Manager, I was responsible for assuring the quality of the project. I also contributed with:

- Spawns and Upgrades System
- Fog of War
- The website
- Randomizing the possibilities

Back In Time

University Project | Sep '19 - Dec '19

2D Platformer game coded for a university subject.
My contribution was the following:

- Collider system implementation
- Entities system
- Save/Load
- Debug features

Samurai Shodown

University Project | Feb '19 - June '19

This was my first project at university. Me and my 3 teammates recreated the fighting game Samurai Shodown from 1993. My contribution was:

- State machine for player movement
- Special attack and combo input
- Basic collider system
- QA: Detecting and fixing bugs

SKILLS

Technical
